Dear sir,

It gives us pleasure to submit you,TopSystems (Moscow)<Intellection (Pune)_CAD domain _Mou (in attached zipped file).

(Note: According to the e-mail from Top systems, they do not have experience of any Mou. So, we retained the Belarus RCTT -pattern of Mou to make it Russian/ CIS friendly.)

This Export Technology_High Tech MOU (2nd Mou by MITCON) involves:
Exportable Technologies:

1) IntellectAutoDetect™ -

IntellectAutoDetect is a technology for automatically detecting sharp edges of a polygonal model.

2) IntellectAutoSegment™ -

IntellectAutoSegment is a technology for automatic segmentation of a polygonal model.

(Refer slide no. 4 of enclosed ppt file 'FmIntlxn_ToT-Flex_prsntn_12Jun07.ppt')

Export of solutions / products =

(Refer slide no. 5 of enclosed ppt file 'FmIntlxn_ToT-Flex_prsntn_12Jun07.ppt')

Export of services: CAD application development services

To enable you trace , validate & endorse the progression to MoU, we are attaching a file that provides the 'crux e-mail- exchanges between us & our clients mainly with Top Systems Russia.(Attaching word doc + ppt zipped together).

Thus we believe, it would not be too unreasonable to call this 'High-Tech (IT), Engineering (Technical), Advance Technology MOU.

We are committed to progress with your guiding directions.

With warm regards

Karmarkar A P
